

# What should I use for my presentation?

	Images	Text
<b>iPhoto slideshow</b>	Shows photos in a sequence with equal amount of time for each. Includes transition effects, and one background song.	You can show a simple photo title on each photo.  <b>ALMOST ONLY IMAGES</b>
<b>iMovie</b>	Shows photos and/or videos with different durations, special effects, sounds, and one or several songs. All elements can be edited.	Shows titles and subtitles in a variety of formats for small amounts of text.  <b>IMAGE-ORIENTED</b>
<b>Powerpoint</b>	Shows photos and/or videos with various durations, special effects, sounds and music. All elements can be edited.	Text can be as long as required. Text can be organized in bullet form, and introduced sections at a time.  <b>TEXT-ORIENTED</b>
